

High-Frequency Reactor

Features

1. Low temperature rise, Natural air cooling.
2. Small and low losses.
3. It can operate under harsh conditions.

Product Applications

High-frequency inverter circuit, high-frequency voltage rises and Step-down Circuit, etc.

Technical Parameter

Working frequency	10 ~ 50KHz	Winding Material	Copper
Working Voltage	110 ~ 600V	Core Material	Ferrite/Nano amorphous
Rated Current	10 ~ 300A	Rated Inductance	0.01mH ~ 0.9mH
Type of Cooling	AN	Working Efficiency	99%
Insulation Class	H	Package	Wood crate
Leading Time	7 ~ 30 working days
